Mandarian (Elementary)

Wilson Lam

Software Engineer at Model Match
Los Angeles Metropolitan Area

Summary

I am a solutions-driven Full-Stack Web Developer with strong skill sets in both Front-End and Back-End. By utilizing these tools, I've built several features for Omou and created websites for local businesses.

Working for Omou has taught me that the world of coding is vast. I've learned a lot from new ways to debug, problem solving from a high level, new frameworks and libraries, etc. While working as a Teaching Assistant for my bootcamp, I've reinforced and improved upon my problem solving skills in both Front-End and Back-End. Inherently, this job also gave me experience in some soft skills like communication, patience, and translating code to English.

While attending the coding bootcamp through UCLA Extension, I gained experience in React, HTML, CSS, Bootstrap for the Front-End while using Node, Express, MySQL and MongoDB for the Back-End.

My love for technology has always been present, from when I first learned how to build my own computer, reading about security vulnerabilities of gaming systems, and watching tech conventions. It is the core of my motivation and why I continually learn new topics on coding.

Experience

Model Match
Software Engineer
March 2021 - Present (2 months)

Omou Learning
Frontend Developer
February 2020 - Present (1 year 3 months)
Greater Los Angeles Area

Self employed
Full-stack Developer
October 2018 - Present (2 years 7 months)
Greater Los Angeles Area

UCLA Extension
Teaching Assistant
September 2019 - March 2021 (1 year 7 months)
Westwood, California

Letter Ride LLC
Delivery Driver
October 2018 - March 2019 (6 months)
Temple City, CA

Education

UCLA Extension
Certificate , Full Stack Web Development · (2019 - 2019)
